Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gillespie et al (5,543,590).

Regarding claim 1, Gillespie teaches of a single-layer touchpad (Fig. 1, reference character 10) for providing input to a device having a display screen comprising a first active electrode (Fig. 2C, reference character 26, and col. 9, lines 6-25) disposed in at least two discrete regions of a touch-sensitive area (Fig. 11, reference character 240, and col. 25, line 57-col. 26, line 2), wherein the first active electrode is generally transparent when disposed over a display screen (it is inherent that the electrode has to be transparent if disposed over a display screen so that the display may be used normally); a sense electrode disposed adjacent to the first active electrode (Fig. 2C, reference character 34, and col. 9, lines 6-25) in the at least two discrete regions (Fig. 11, reference character 240, and col. 25, line 57-col. 26, line 2), wherein the sense electrode is generally transparent when disposed over the display screen (it is inherent that the electrode has to be transparent if disposed over a display screen so that the display may be used normally); and a touchpad sensing circuit (Fig. 3, reference character 40) coupled to the first active electrode and to the sense electrode, wherein the touchpad sensing circuit

determines when a pointing object makes contact in the touch-sensitive area, and in which of the at least two discrete regions the pointing object has made contact (col. 11, lines 11-35).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 703 305-2248. The examiner can normally be reached on Monday through Thursday from 7:00 A.M. to 5:30 P.M.
